Time Management

OBJECTIVE

Highly skilled and motivated Application Development Analyst with a strong background in Web Development. Targeting a challenging position in the IT industry, specifically in Web Development, to utilize the expertise & contribute to the success of the organization.

PROFILE SUMMARY

- Around 2 years of experience in Software development, specializing in Web Development
- Currently working as, a Software Development Analyst at Accenture, Noida, created RESTful APIs with Express.js and implemented responsive Web Design using React.js.
- Strong problem-solving and analytical skills, with the capability to work effectively in a team environment.
- Illustrated a consistent track record of successfully delivering high-quality projects and consistently achieving exceptional results
- Achieved a 20% increase in web application responsiveness by successfully implementing debouncing, throttling and efficient state management in a already deployed website within a tight deadline
- Conducted code reviews and provided constructive feedback to improve code quality and maintainability, contributing to the overall success of the projects

WORK EXPERIENCE

Software Development Analyst, Accenture, Noida
Aug 2021 – Present

Project 1 – **myConcerto**
Key Result Areas:
- Created RESTful APIs with Express.js to handle CRUD operations
- Implemented Responsive web design for client's website using React.js

Project 2- **F1 DEFENSE**
Key Result Areas:
- Developed SAPUI5 applications using JavaScript, HTML, CSS
- Created user interfaces, implementing business logic, and integrating with back-end systems by consuming OData services

PROJECTS

Project 1 **– Paytm Application, (2023)**
Key Result Areas:

- Developed a full-stack web application using React, Express, MongoDB
- Implemented user authentication and authorization using JWT
- Used Zod for database
- Utilized Recoil for managing the application's global state
- Integrated front-end and back-end using Axios library
- Used react-router-dom for routing and protected routing
- Used debouncing, throttling to make it more responsive and efficient
- Deployed the application on vercel and render.
- Used Postman for API testing

Project 2- **Portfolio Application**
Key Result Areas:

- Developed my web portfolio showcasing my projects and other details.
- Used Next.js for the development and deployed on Vercel.
- Used responsive design principles for better viewing experience across devices
- Integrated interactive elements such as animations and transitions.
